

INTERNATIONAL TRAINING PROGRAM
PRENATAL BONDING (BA) CURRICULUM

*The Soul's Cord - A Method for
Encountering the Unborn*

NEW SCHEDULE

Training is conducted by
GERHARD SCHROTH, MD, Psychoanalyst
ANNE GOERTZ-SCHROTH, PB(BA)-Trainer

Prenatal Bonding (Bindungs-Analyse by Raffai) opens a window to the womb and helps to create an intense bonding between mother and her unborn baby. This method is at the same time an empowerment for the mother and the fetus and a great help for a full-term pregnancy and for giving birth much more easily. After birth, the babies are reported to be easier to nurse and experience a more secure attachment to their parents, having a remarkable degree of self-esteem and full access to their personal potential. Based on extensive research in Psychoanalysis and Pre- and Perinatal Psychology and Medicine, the Hungarian Psychoanalyst Jenoe Raffai, PhD developed this ground-breaking strategy to support pregnant women from the early beginning of gestation until birth. More than 7000 cases in Europe and USA have been facilitated, researched and carefully evaluated since 1995 with outstanding results for physical, as well as emotional maturity of the babies.

**Prenatal Bonding (BA) is the most extended general health prevention
for a future generation available at this time**

Registrants are invited **from all fields associated with pre- and perinatal psychology and medicine** as well as infant mental health, clinical and developmental psychology, clinical social work, early intervention providers, psychoanalysis, obstetrics, midwifery, doula, nursing, pediatrics, family medicine and related professions.
